READY TO LEVEL-UP YOUR SCHOOL CAMPUS RECYCLING & WASTE DIVERSION PROGRAMS?

SIGNS OF SUCCESS

Successful recycling and waste diversion programs for schools and campuses begin with clearly labeled, well-designed bins that are **durable, easy to service, and expandable to support multiple streams**—including the streams you collect now, and future streams added as local legislation expands. With CleanRiver you get more than just a great bin. Our zero waste experts are dedicated to helping you create a sustainable culture of recycling and waste diversion with both products and solutions that support your success all along your journey towards zero waste.

START WITH THE 3Cs

Go beyond the tried and true 3Rs of reduce, reuse and recycle to cultivate a more mindful and motivated community of users. Start with the 3Cs:

Culture

Start at the heart of campus culture to embed responsible waste management into the fabric of your school.

Communication

Whether it's an indoor or outdoor bin, clear visual cues on every container are game changing for getting waste in the right place. Show students and staff where waste goes, and they will get it there. By sharing ongoing communication, you'll ensure meaningful engagement—and ultimately—better results as your waste diversion and recycling programs grow.

Collection

Develop well-planned collection strategies designed to scale to ensure your programs remain impactful for years to come.

BETTER BINS DRIVE BETTER PROGRAM PERFORMANCE

BETTER BINS = BETTER RESULTS

Foundational to your waste diversion and recycling strategies is the humble bin. Bins that are thoughtfully designed make all the difference in the world when it comes to keeping your streams clean, servicing efficiency, long-term maintenance, and even how often you need to replace your bins. All this adds up to cost savings.

Cleaner Streams

Receptacles with the right-sized openings based on what you're collecting keep waste from flowing into the wrong streams.

Faster Servicing

Bins designed with your custodial team in mind, are easier to open, faster to service and include convenient ergonomic details your staff will love.

Sustainable, Long-lasting Materials

Great bins begin with great materials. Best of all, bins made of HDPE plastic lumber (with recycled materials diverted from landfills) are not only weather-proof, durable, and easy to maintain—they're simply better for the environment. CleanRiver has set the benchmark for quality and performance, so you can count on our bins to be:

- **Rust-free, Weather-proof & Climate Change Ready:** Compared to metal bins, bins made of HDPE plastic lumber are longer lasting, water-proof, and weather-proof. From California summers to Alaskan winters, we've got you covered
- **Mold & Mildew Resistant:** Bacteria's got nowhere to go with material that is impervious to oil, water, insects, and even chemicals
- **Cleaning Crew Approved:** our bins are easy to clean with water and mild solutions, require no sealing, staining, or even paint touch-ups

Let's Talk Trash.

HIGH PERFORMANCE INDOOR BINS

- HALLWAYS
- BATHROOMS
- LOUNGES
- CAFETERIA
- DORM ROOMS
- LIBRARY
- OFFICES
